Description

Curious, creative, and cultured, I have just completed a bachelor's degree in MMI in New Caledonia. Through my education and personal projects, I have mastered the fundamentals of audiovisual production, web development, graphic design, and digital communication. I am eager to continue my education journey.

Interests

A passionate reader since childhood, I grew up immersed in the fantasy worlds of Tolkien, Sapkowski, and Martin. These universes are a great source of inspiration for my various creations. In addition to reading, I am also a huge fan of video games, a field that fascinates me so much that I want to make it my career. I also practice HEMA (Historical European Martial Arts), which further enriches my imagination. I hope that one day, I can combine my love for fantasy literature and video games by creating my own immersive and captivating worlds.
